EDUCATION

University of Toronto

Honours Bachelor of Science, Computer Science (Specialist in Entrepreneurship Stream)

Sep 2020 - Sep 2025

Toronto, ON

SKILLS

Languages: Python, C, TypeScript, JavaScript, Java, SQL, HTML, CSS
Frameworks: Angular, React, Tailwind CSS, Next.js, Django REST, JUnit, unittest
Databases: PostgreSQL, MySQL, MongoDB, AWS (DynamoDB & RDS)
Tools: Git, Docker, Postman, AWS, Figma, New Relic, Jira, OAuth, Socket.IO

EXPERIENCE

Full Stack Developer

Temerity Analytics

Sep 2024 - Apr 2025

Toronto, ON

- Built secure features like role-based access control, API key authentication, and PDF/CSV reporting using **Django REST** and **Angular**, improving data security and automating reporting workflows.
- Automated mobile app's backend deployments using **Docker** and **AWS (CodePipeline, EC2, ECR, S3)**, reducing release times and increasing deployment reliability.
- Implemented EU-region authentication and data storage via **Django REST** and **PostgreSQL** integration with request routing in **Angular**, improving accessibility for international users.

Cloud Developer

Caseware International

Jan 2023 - Aug 2023

Toronto, ON

- Worked on development and deployment of an ETL pipeline using **AWS (Lambda, Step Functions, SQS, DynamoDB, RDS)** to extract and transform historical data, enabling support for new feature licensing
- Built a UI component in **Angular** with **AWS Lambda** backend APIs to track a client's historical data extraction progress, improving client accessibility and visibility into processing status.
- Built an internal **New Relic** dashboard using **SQL-like NRQL** queries on **AWS CloudWatch** logs to monitor historical data extraction processes, improving QA productivity and accelerating bug identification.

PROJECTS

SoundSync Ensemble

- Built a web app enabling real-time group music creation with MIDI instruments using **React**, **Next.js**, **Tailwind CSS**, and **Socket.IO**.
- Implemented listening and playback features by compiling individual user inputs into a single audio file using blobs, stored in **MongoDB**.
- Deployed on **DigitalOcean** using **Docker** and **Nginx** with SSL encryption via **Let's Encrypt**, including domain configuration.

LangChain AI Open-Source Contribution

- Merged a PR implementing support for a new **LangChain** Agent tool that enables multimedia retrieval via NASA's Image and Video Library API.

MaestraAI

- Prototyped an AI-powered engine that generates personalized educational videos using OpenAI (LLM), ElevenLabs (TTS), Wav2Lip, and MidJourney.
